Ecological stability is a goal to be constantly approached but possibly never reached. To say it is all just subjective is an artifice we use to avoid examining the reasons for ethical decisions Marks, 2000, p. From an ethical standpoint, to evaluate what is good, we must begin with moral judgements before general principles can be reached.

Furthermore, teleological human existence is grounded in the way humans are biological organisms. Our present system fails to achieve the first goal for many agricultural producers.

Moral Philosophy

Three kinds of questions can be identified. For now, I will stay with the paradigm that robots and AI are programmed entities, lacking a teleological context for the way they are goal directed. Agriculture has not typically been regarded by its practitioners as a social enterprise.

Moral Philosophy

That implies that agriculture is not compatible with a just social order and not directed toward achieving justice for all. The capacities or, as it has generally come to be known, the capabilities approach has gained prominence in recent years.
