Her machinery impels her at the rate of five and a half knots an hour, and her inventor felt confident that in a calm, or light breeze, no seventy-four would be a match for her.

Robert Fulton (Author of Up in the Air, A Pilot's Journey)

The Steamboat Clermont In December 1806, Fulton and Robert Livingston reunited in New York to resume work on their steamboat. After all, if we can't make a profit, we won't be able to keep the lights on and continue to invent more amazing things! Fulton's partner, Robert Livingstone, who had negotiated the Louisiana Purchase from France, obtained an exclusive license for steamboat services on New York's Hudson River. At the first trial the boat ran perfectly, but the hull was later rebuilt and strengthened.

Robert Fulton's Invention of the Steamboat

His career would take him to Europe -- and into the orbit of people with the power to back him politically and financially. I became a doctor to work directly with others to help them achieve this, finding it a privilege to build relationships with my patients that span the ups and down of their lives.
