American Automotive Industry

The imposition of new fuel economy standards should be evaluated with this reality in mind. Four decades ago, California was home to five auto assembly plants operated by the Detroit 3. The development of roads, increasing standard of living, increasing middle-class population in developing regions, are the factors driving the automotive industry sector.

Decline of U.S. auto industry linked to midcentury shift in production models

The Influence of Large Technology Companies Continues In 2019, large technology companies continued to invest in the automotive space, placing significant bets on future automotive technologies. Specifications for components or systems should be clearly set forth in contract documents, and efforts should be made to limit or disclaim any inapplicable warranties, including warranties outside the scope of design or integration responsibility. Retention and hiring of workers in an already tight labor market may prove increasingly difficult given that the gap between minimum wage and the wages paid to automotive industry production workers is shrinking in some places.

The Changing Geography of the American Auto Industry

In addition to vehicle positional and behavioral data, V2V and so-called vehicle-to-infrastructure V2I communications could potentially transmit environmental data, such as road conditions, to surrounding vehicles.

The Changing Geography of the American Auto Industry

However, while the Model A was successful, Ford lost ground to GM and eventually Chrysler, as auto buyers looked to more upscale cars and newer styling. The high tax on gasoline no doubt serves an important role in prompting acceptance of such new technologies.

Top Legal Issues Facing the Automotive Industry in 2020

Chief among these are the ongoing concern regarding tariffs on products such as steel and aluminum, and the on-again, off-again trade disputes with China.
