Impact of rural road construction on the local livelihood diversification: evidence from Pradhan Mantri Gram Sadak Yojana in Jhunjhunu district, India

Our results indicate that these variables can have powerful effects in terms of long-term reduction in poverty. These studies were conducted in developed countries, so it is not unexpected that the coverage rates and travel time estimates in these previous studies are considerably higher than those estimated for Alta Verapaz.

From the Cover: Poverty And Hunger Special Feature: Spatial determinants of poverty in rural Kenya

Capacity building is widely acknowledged to be important but is often poorly defined.

geographic analysis of access to health services in rural Guatemala

Brighton, UK: Institute for Development Studies.

The impact of road improvements on road safety and related characteristics

Replication is the most established method of research validation in science, yet it has not been fully embraced by the research community or development donors, leading to this gap.

Impact of rural road construction on the local livelihood diversification: evidence from Pradhan Mantri Gram Sadak Yojana in Jhunjhunu district, India

It has a wide range of climatic zones from arid to humid tropical type and has livestock keeping, tourism, and farming as the major sources of income.

Data Access

We also simulate the potential direct impact of a change in soil fertility on poverty incidence in Western Province.

Data Access

Ranking fuzzy numbers with index of optimism.

Monitoring and Evaluation

The job of the project manager in this process is to point out those areas in need of monitoring or evaluation. The results of the national-level analysis suggest that there are concerns with the variations and significance of the variables.
