Women's Health

Other women need to use medicine every day to control long-term health problems like asthma, diabetes, depression, or seizures. In a perfect world, every medicine label would include helpful information about the medicine's effects on pregnant women and their growing babies. Prescription medicines The FDA chooses a medicine's letter category based on what is known about the medicine when used in pregnant women and animals.

As this prescription information is updated, it is added to an online information clearinghouse called that gives up-to-date, free information to consumers and health care providers.

What health issues or conditions are specific to women only?

To help doctors, the FDA created pregnancy letter categories to help explain what is known about using medicine during pregnancy.

What health issues or conditions are specific to women only?

We couldn't include everyone -- and thank goodness the entirety of female medical accomplishment cannot fit squarely into 50 slides. You should begin taking these vitamins before you become pregnant or if you could become pregnant.

But in most cases, there is not much information about how a medicine affects pregnant women and their growing babies. If there are no problems in the rat babies, it does not prove that the medicine will not cause problems in human babies. This means they provide daily or regular support to children, adults, or people with chronic illnesses or disabilities.

If you are pregnant and are using a medicine or were using one when you got pregnant, check to see if there is a pregnancy exposure registry for that medicine. You should begin taking these vitamins before you become pregnant or if you could become pregnant. Now, we live in a country where and a country where we value -- -- retelling the accomplishments of women in our own history.
