### CS101: Introduction to Computer Science I

The problem sets were pretty good too.

### CS50: Introduction to Computer Science

It will also give students an opportunity to assume the role of a computer scientist. Completing this unit should take you approximately 6 hours.

### CS101: Introduction to Computer Science I

The many practice quizzes are very useful and I could follow the first half of the course but when I encountered a problem with an exercise around the middle of the course I couldn't solve it and since I was too busy to find other help e. I took it concurrently with the Rice python course on Coursera, and I found that the two courses complemented each other very well, though it was hard to find time to complete all the assignments for both courses.

### Introduction to Computer Science: styleguide.expo.io

Completing this unit should take you approximately 9 hours. After much back and forth I received a review copy of this book. The problem sets are designed in such a way that one is forced to read and do further research to accomplish them.

### CS 125: Introduction to Computer Science

Purists may complain about the author's use of emojis. Grimson's lectures were a pleasure to watch. I've been meaning to really sit down and learn what's going on, but was overwhelmed by the magnitude of terms to look up.

### Free Online Course: Introduction to Computer Science and Programming Using Python from edX

If your program does not perform correctly on a particular test case, you will not receive points for that test case. Take this exam if you want to earn college credit for this course. The web design module was probably the most fun even though for me personally it was the most demanding.

## **CS50: Introduction to Computer Science**

By the end of this unit, you will have a strong understanding of how to define and call a method. As an example the first 3 'week' projects are due 4 days apart Thurs, Tue, Fri due dates so the 'week' concept was a bit misleading. Prepare to be infuriated after watching 5-6 hours of video content and realizing that you still have absolutely no idea how to actually do the homework.
