The sciences of observation describe and measure with ever greater precision the multiple manifestations of life and place them on a timeline.

Dispelling the Myth of Abiogenesis and Evolution

They do not negate the fact that evolution has occurred, but centre on the concept that natural selection is not the only mechanism by which evolution can progress. But if one of the monkeys was given grapes, something interesting happened: After receiving the first piece of cucumber, the capuchin monkey gave the experimenter a rock as expected.

Church of Reality

If faith affirms that the world has a temporal beginning, can reason demonstrate this must be true? There is not the slightest doubt that, if a general council of the Church scientific had been held at that time, we should have been condemned by an overwhelming majority. With an emphasis on family and social harmony, Confucianism was a distinctly humanist and even secularist religious ideology. He has scaled the mountains of ignorance; he is about to conquer the highest peak; as he pulls himself over the final rock, he is greeted by a band of theologians who have been sitting there for centuries.

Dispelling the Myth of Abiogenesis and Evolution

Recent work in the field of science and religion has examined the implications of this research for the justification of religious beliefs. Chance and stochasticity are important features of evolutionary theory the non-random retention of random variations.
