## The Relationship Between Technology and Religion

If we look to only one or the other, we will get a distorted view of the issue.

## Scientists Matter to the Church

.

## About ISCAST

This religious fervor was carried along by other leaders of America's space program. Are we the only ones in the need of redemption? The power in the atom, momentum, energy, mass, time, etc.

## The Relationship Between Technology and Religion

Christian theologians who agree that science has found no evidence for God have made heroic efforts to develop a plausible mechanism by which God can act in the physical world without that act being detected.

## Christian Science

A simple test can be made for any claimed religious experience.

## A Christian Perspective on Computer Science

This makes it quite possible that the cosmos is infinite and eternal, a multiverse of many universes, in which case there was no creation since there was no beginning.

## Science and Christian Faith: Conflict or Cooperation?

Schaeffer: How Should We Then Live Revell, 1976 , p. But eventually they are ultimate commitments, issued under the seal of our personal judgment. Christians should protect the environment for the use by future generations.
