The Workrelatedness of Airways Dysfunction. Bureau of Mines investigated column flotation for recovery of a high-grade fluorite  $\text{CaF}_2$  concentrate and byproduct concentrates from the Fish Creek fluorite deposit in Eureka County, Nevada. The recovery scheme consisted of 1 grinding the ore to minus 48 mesh, 2 fluorite rougher and cleaner flotation, 3 desliming the rougher fluorite flotation tailings at 20  $\mu\text{m}$ , 4 mica flotation, and 5 silicate rougher flotation. Separation efficiency of this separator depends on mineral characteristics and the design features of equipment along with Cited by: 4.
