**Sadler, David 1960**

Accelerated development in sub-Saharan Africa: an agenda for action English.

**case for reindustrialisation in developing countries: towards the connection between the macroeconomic regime and the industrial policy in Brazil**

On several occasions, the Brazilian ISI process, which occurred from 1930 to the late 1980s, involved currency devaluations to boost exports and discouraging imports, thus promoting the consumption of locally-manufactured products, as well as the adoption of different exchange rates for importing capital goods and for importing consumer goods.

**Sadler, David 1960**

He also mentioned the need to form a real sovereign fund for capital intervention by bringing together the State Participation Agency APE and the BPI Public Investment Bank.

**New jobs for old? Reindustrialisation policies in Derwentside in the 1980s**

The enlargement and integration of the European Community in the 1980s is of profound significance for the present — and future — citizens of Europe. It has been argued that all or virtually all nations that have industrialized have followed ISI. ISI policies have been enacted by developing countries with the intention of producing development and self-sufficiency by the creation of an internal market.

**Professor David Sadler**

The industrial sector would use resources, capital, and labor from the agricultural sector. That allowed post-colonial states to nationalise industries and retain the profits from their output, rather than allow capital flight to the west through multinational corporations. The digital revolution is reshuffling the cards and can be a chance for France if it quickly gets up to speed in this area.

**Krylov**

Journal of African Economies: 65. This ability to plan must go hand in hand with greater state agility.

**University of the Witwatersrand Library**

The evolution of the discourse of the political class is just as striking.

**Sadler, David 1960**

What about the mobilization of industrialists? Joachim Imad is director of the Res Publica Foundation. Russia has considerably reduced its food imports, and domestic production has increased considerably.
