The Nursing Shortage: Solutions for the Short and Long Term

Up to 32 percent of community-dwelling individuals over the age of 65 fall each year, and females fall more frequently than males in this age group. Case Study: The Oregon Consortium for Nursing Education OCNE.

The Nursing Shortage: Solutions for the Short and Long Term

Programs to recruit and retain more individuals from racial and ethnic minority groups in nursing education programs are needed. The task at hand is to explore what the life goals may be, and then translate these into goals relevant for care.

Transforming Education

Toronto Rehabilitation Institute Interdisciplinary Collaboration in the Delivery of Primary Health Care Services : Inclusion of Psychologists in Family Medicine Teams IPFMT The aim of the project is to develop a real interdisciplinary collaboration between psychologists and physicians in a family medicine practice; collaboration based on principles such as proximity, direct access, integration, continuity, coordination and collaboration.

Care Coordination for People With Alzheimer's Disease and Related Dementias

Both were based on analysis of salient themes in the empirical material in light of the PC-IC process ideal and progressively more informed

applications of themes and questions. This review summarizes the current research related to fall and injury prevention.

Fall and Injury Prevention

The informants did not focus much on other overarching biomedical goals which they felt were self-evident. Subsequently, these methods were translated into practical strategies. Mayo and colleagues conducted a randomized controlled trial to examine if armbands would help identify high-risk patients in a rehabilitation unit and prevent falls in the high-risk group.
