Aircraft Observations of Meteorological Conditions along Africa's West Coast between 30°

. Our mission remains true and this project involves all aspects of our celebrated objectives. These results focus on the summer season, when the periodic....

aerodrome climatological summary

Case studies, selected from 600 h of aerial survey data encompassing a variety of weather conditions, are used to illustrate mesoscale gradients in the wind, air and sea temperature fields forced by local topographic features.

Airbus' Metron Aviation and the Danish Meteorological Institute to assist EUROCONTROL with modeling ATM disruption risks

These impacts will be computed by a sophisticated risk assessment model RAM and disseminated to all stakeholders using a web-based graphical interface to provide shared situational awareness. .
