## The Effectiveness of Art therapy Interventions in Cancer Center Institutes

In an additional study conducted at the Chelsea and Westminster Hospital, Staricoff compared the use and nonuse of an art intervention in different units of the hospital. BMBF-Förderung für die Erforschung von Tanz als Mittel kultureller Bildung.

## Frontiers

We conducted a review of current research to determine what is known about art and healing. We do not claim to eliminate bias or to present a complete, objective version of the current state of research. One study choses a mixed methods approach.

## A systematic review of the effectiveness of mental health promotion interventions for young people in low and middle income countries

This paper reviews 10 articles examining social skills training interventions for youth with ASD, and found that 7 of these papers reported positive treatment effects, although these were sometimes limited to a subset of participants or outcome measures. Overall, study quality of studies with quantitative measures ranges mainly in the lower and middle third of the rating scale. This paper analyses five randomised control trials evaluating the effects of social skills groups in 196 participants with ASD aged 6 to 21 years old.

## A systematic review of the effectiveness of mental health promotion interventions for young people in low and middle income countries

The CCEERC Quantitative Research Assessment Tool as well as the JBI Checklist for Qualitative research were assessed to rate the studies' quality.

## The role of a new strength

It will be used to respond to your enquiry and to get in touch for feedback. However, some studies do not give reasons for their choice of a specific dance style or do not even chose a specific style.

#### **A systematic review of the effectiveness of mental health promotion interventions for young people in low and middle income countries**

Finally, to test Hypothesis 4, we used the PROCESS macro Hayes, 2013 and conducted a bootstrapping-based analysis.
