The Nommos, Dolphin & Whale People

Eventually, their tails became bigger and stronger for powerful swimming and their back legs shrunk. This number has been increasing each year, from being allowed to kill 600 mink whales in 2002 to more than a thousand today. In evolutionary terms, we humans have only had big brains for about 200,000 years.

James Bartley

They cut the stomach open, and out rolled Bartley, unconscious but breathing, his face and arms bleached entirely white by the stomach acids. Modern harpoons are usually fitted with penthrate grenades that will penetrate about 12 inches one foot into the body before they explode, releasing claw-like protrusions into the flesh.

People and Whales: A History

Shortly before sunset, the now dead whale floated to the surface a few hundred yards from the ship. This argument still does not truly justify killing the whales though — the practice is unnecessarily cruel and the nutrition of the meat is so polluted as to even be poisonous.

People, Fish and Whales: The Vancouver Aquarium Story: Newman, Dr. Murray: 9781550173826: styleguide.expo.io: Books

Nurture versus nature In many cases, whales, dolphins, and porpoises are cared for by their mothers for several months to several years and fed milk during their first year to make sure they grow up healthy and hunt and survive independently. When viewed from above, the gripping disk looks like the sole of a running shoe, which the fish controls with the aid of tiny barbs that help hook to the skin.

A Sea Of Blood: The Whale

The inside of the library is full of polished wood. Blue whales are also loud - their sounds have measured to reach 186 decibels only the sperm whale is louder.

James Bartley

The cabinet was big as three refrigerators side-by-side, divided by tens of 6-inch-square drawers packed with hundreds of index cards, references for the mammoth collection of whaling logbooks held at the Research Library. But when you pray, go into your room, close the door and pray to your Father, who is unseen.
