Suddenly the Whole World is Colorblind Too

Human biology review, 5 1 , 65-71. Now he suddenly managed very well in the same test. .

Colorblind: About CVD

This is certainly cheaper than the physical version, and it is part of the website from XRite, so you know it's not from some fly-by-night guy who claims to be a color scientist and maybe has a silly blog where he pretends to know what he is talking about. Using this filter, which comes in both eye glasses and glass loupes, noncolorblind people can experience the perceptual color confusion experienced by the colorblind due to the lack of one type of cone photoreceptor out of the three that support color vision. Journal of Consumer Research, 19, 155—179.

John the Math Guy: Follow up on colorblindness testing

Marketing to consumers with disabilities.

Seeing through the eyes of the colorblind

I had managed to miss both social media phenoms that occurred last Thursday until late in the day. For example, people with achromatopsia suffer from a completely different disorder, but are nevertheless unable to see colors.

Eye of the beholder: How colour vision made us human

When a customer asks you for a custom gallon of sky blue ink, what color are they really asking for? If two colors are similar in lightness and tone, I have difficulty identifying them correctly. The above factors are meant to make you consider the tools you have.

Suddenly the Whole World is Colorblind Too

Images of living human retinas showing the wide diversity of number of cones sensitive to different colors.

Color Is In The Eye Of The Beholder by Arlene Evans

Representation of colors in the blind, colorblind, and normally-sighted.

Color Perception Is Not in the Eye of the Beholder: It's in the Brain : Rochester News

Leveling the playing field for visually impaired consumers: A public policy and research agenda. I'm terrible when it comes to matching colors from memory.
