

Dissolved solids and sodium in water from the High Plains aquifer in parts of Colorado, Kansas, Nebraska, New Mexico, Oklahoma, South Dakota, Texas, and Wyoming

U.S. Geological Survey - HA 730

Description: -

- Ceilometer.

Southwest, New -- Maps.

Groundwater -- Southwest, New -- Maps.

Water -- Composition -- Southwest, New -- Maps. Dissolved solids and sodium in water from the High Plains aquifer in parts of Colorado, Kansas, Nebraska, New Mexico, Oklahoma, South Dakota, Texas, and Wyoming

- Eighteenth century -- reel 6700, no. 01.

Hydrologic investigations atlas -- HA-658. Dissolved solids and sodium in water from the High Plains aquifer in parts of Colorado, Kansas, Nebraska, New Mexico, Oklahoma, South Dakota, Texas, and Wyoming

Notes: Includes text, tables, and bibliography.

Historical Water

These pathogens may pose a special health risk for infants, young children, and those with compromised immune systems. Geochemical response of CO₂ leak Figure compares the simulated geochemical response of a model sandstone aquifer saturated with respect to CO₂ gas with the ambient groundwater chemistry measured from the High Plains aquifer from 40 to 240 m below the ground surface. Description of Study Area The study area is limited to the two Cheyenne municipal well fields and surrounding area figure 1.

USGS: Mineral Resources On

The study identified ten priority alluvial aquifer storage sites and six sedimentary bedrock sites with a total storage capacity of almost 130 million acre feet.

USGS Central Nebraska Basins NAWQA Study Unit

Our top priority is to protect pregnant women from the potentially devastating harm caused by Zika.

Ogallala Aquifer: USGS warns of gradual increase of contaminants

Plots show plume details between the CO₂ leak source and sampling well at discrete time steps. As the cost of water increases, irrigated agriculture becomes less economical, and the future of this important agricultural area could become uncertain.

USGS Water Resources NSDI Node

Small capacity wells remained exempt and essentially unregulated until 1971.
