Fit for learning: what research says about the benefits of sport

Ninety-seven percent of adolescents age 12-17 play video games — on a computer, on consoles such as the Wii, Playstation and Xbox, or on portable devices such as Gameboys, smartphones and tablets.

Learning from Television: A Research Review

Pediatrics 2011;128 1 :201—8; erratum 128 3 :594. The other half of the children were split into two groups. Pediatr Emerg Care 2012;28 7 :712—4.

Screen time and young children: Promoting health and development in a digital world

If we reduce face-to-face interaction drastically, it's not surprising that the social skills would also get reduced.

Effects of television viewing on child development

The researchers focused on low- to moderate-income families for several reasons: these families have been underrepresented in previous research, they tend to watch TV frequently, and many educational programs are targeted at them. A report on the effect of the United Streaming application on educational performance.

Young children learn by copying you!

Film research dominated until about 1959 when the Pennsylvania State University studies turned to research on learning from television.

Ban under

A recent study of smartphone use in fast-food restaurants observed that as time spent by parents on their phones increased, so too did the likelihood of children acting out to gain attention, often leading to negative interactions .,

Screen time and young children: Promoting health and development in a digital world

Sesame Street is for babies, but it taught manners and good values as well.
