48 Common British Garden Birds ideas

Or the maximum count of stationary, perched or chirping birds as you walk along a street. By drumming, the bird is telling other great spotted woodpeckers to stay away! Common and binomial names Image Status *Sula leucogaster* A rare vagrant, first recorded 2019. There are five species worldwide, all of which occur in Britain.

British Garden Birds

Occurring most winters on the eastern half of the UK, these starling-sized birds sometimes erupt east from the continent, apparently due to failure of the berries they rely on, and then we are inundated with flocks of these amiable, and often very approachable, birds. Orioles are arboreal and tend to feed in the canopy.

A guide to British birds of prey

Their food is insects and seeds.

Britain's Top 10 Most Common Garden Birds

The female is brown all over, with grey-brown underparts. Robins do migrate, but much earlier in the autumn. There are over 120 species worldwide with nine in Britain.

Britain's Top 10 Most Common Garden Birds

Not as common a sight as the blue tit, so a special treat if you see one. Their flight is strong and direct and most are very gregarious.

24 Common British Birds You Can Find In Your Garden

So anything we can do to augment their slim pickings gives a real boost to their chances of survival.

British Garden Birds

You might also see it perched in a tree or on a telegraph pole by the side of the road. Juveniles are mottled brown all over, with no red breast. Greenfinch The greenfinch is another colourful bird that displays flashes of green and yellow as it flies.

Dominic Couzens

There are 11 species worldwide with one in Britain. Wood pigeon Their name may be a giveaway to their aesthetics, however this only really applies to the males.
