Endothelial Function Testing

A population-based familial aggregation analysis indicates genetic contribution in a majority of renal cell carcinomas.

Renal cell carcinoma

Anticoagulant effects Protein C exerts a potent anticoagulant effect by inhibiting thrombin generation. This paper reports on the prevalent mutations in metastatic ccRCC tumours and the prognostic and predictive values of molecular classification of ccRCC based on genomic mutations in patients treated with targeted therapies in a randomized trial. More specifically, aqueous suppressants such as topical beta blockers, alpha agonists, and carbonic anhydrase inhibitors are typically used, rather than medications that would target the aqueous drainage sites of the eye e.

Iridocorneal Endothelial Syndrome and Secondary Glaucoma

Stage pT1 conventional clear cell renal cell carcinoma: pathological features associated with cancer specific survival.

Renal cell carcinoma

Evaluating renal cell carcinoma cell lines as tumor models. The somatic genomic landscape of chromophobe renal cell carcinoma.

Protein C

Effects on survival of BAP1 and PBRM1 mutations in sporadic clear-cell renal-cell carcinoma: a retrospective analysis with independent validation. Basic and Clinical Science Course BCSC.
