## AND EFFICIENT PRICING IN TOWARDS A LEVEL PLAYING FIELD?

A monopoly is less efficient in total gains from trade than a competitive market. They will generally be auctioned. The Green Paper argues that fair and efficient pricing should constitute an essential component of a transport policy strategy and can contribute significantly to reducing some of the main transport problems notably congestion, accidents and environmental problems.

The two sectors largely rely on fossil fuels, such as heating oil, natural gas, gasoline and diesel. AMS services and its millions of dollars in annual also create opportunities by supporting economic development in small towns and rural communities that stand as the backbone of American values. These would otherwise freeze when the gas is cooled and so cause blockages.
