European industrial strategy

It is also well integrated into a number of other EU policies such as those relating to trade, the internal market, research and innovation, employment, environmental protection and public health. The additional personnel and resources that will come with the new directorate general might help the commission to focus its efforts, including on the EDF, the Action Plan on Military Mobility, and defense-related space policy.

General principles of EU industrial policy

It will present a comprehensive action plan in 2021 to reflect the objectives of the Green Deal across all its sites and become climate neutral by 2030.

European champion

The remaining intersections are not depicted for the sake of readability. Launched by the Commission in October 2010, it aims to improve conditions and access to finance for research and innovation in the EU so that innovative ideas can be turned into products and services that create growth and jobs.

Industrial design rights in the European Union

The goal was to increase competition and create economies of scale that would eventually lead to lower defense costs for EU member states.

Innovation policy

On 21 July 2020, the European Council agreed on the recovery plan for the EU, which combines the MFF for the years 2021-2027 and the funds to be made available through the NGEU. Journal of the Early Republic. The package proposes to revise several pieces of EU climate legislation, including the EU ETS, Effort Sharing Regulation, transport and land use legislation, setting out in real terms the ways in which the Commission intends to reach EU climate targets under the European Green Deal.

EU climate action and the European Green Deal

Alongside reducing greenhouse gas emissions, the EU is also taking action to adapt to the impacts of climate change. The provides for the recognition of the of an application for design right registration in a country which is either a member of the or a party to the.
