Checklist of fish and invertebrates listed in the CITES appendices and in EC Regulation No. 338/97 (7th edition)

Resource type Publication Topic category Environment Reference date 2005 · · Citation UNEP-WCMC. CITES regulates international trade in wild animals, plants and products derived from them, helping to ensure their conservation on a global scale. .

Checklist of fish and invertebrates listed in the CITES appendices and in EC Regulation No. 338/97 (7th edition)

The purpose of this publication is to provide a taxonomic list of fish and invertebrates included in Appendices I, II and III of the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES together with their conservation status category in the 1994 IUCN Red List of Threatened Animals. This document incorporates additions and amendments to the CITES appendices up to and including those made at the 9th Meeting of the Conference of the Parties in Florida in November 1994 effective from 16 February 1995. Few invertebrates and a small proportion of fishes have received a status assessment consequently the Red List contains only a small sample of the species from these groups that

may in fact be threatened.
