MoviPrep®, HalfLytely® or pill preparations e.

### Hot Topics in Gastroenterology

Although there certainly were areas of interest reviewed, much of the presentation is of only marginal value to most gastroenterologists, internists, and general practitioners. This test, however, involves radiation exposure which may increase your long term risk of development of cancer.

### Topics in Gastroenterology

These groups frequently also provide consultation services to hospitals and may manage patients with gastrointestinal problems as inpatients. He conducts research and lectures nationally and internationally on the doctor-patient relationship and the psychological and spiritual dimensions of medicine, including the role of faith, religion, and prayer in clinical care and healing.
