## The State of Environmental Activism in China

Youth is driving global demand for more sustainable products, and for companies to be invested in responsible behaviour and ethical business practices. The result of this has been a wave of advocacy surrounding ethical business that has swept across Asia-Pacific. The main source of pollution is untreated domestic and industrial wastewater.

## EARSS: State of the Environment Reporting, Asia

ASEAN has addressed this critical issue with its 2015 ASEAN joint statement on climate change adopted at the 13th ASEAN Ministerial Meeting on Environment, in Hanoi in February 2017.

## The State of the Environment in Asia

However, because of the limited environmental carrying capacity of the region and the immense pressure exerted by the changing consumption and production patterns, environmental degradation continues. Another Nobel Peace Prize winner is from for her peaceful and non-violent struggle under a military dictatorship in Burma. Taoism is easily syncretized with for many Chinese, thus exact religious statistics is difficult to obtain and may be understated or overstated.

## The State of Environmental Activism in China

Rising sea levels cause increased salinity that can have damaging impacts on the country's extensive system of. Tatishchev announced that he had proposed the idea to von Strahlenberg. First off, the Himalayan glaciers that serve as the sources for many of the major Asian rivers — including the Mekong, which passes through China, Myanmar, Laos, Thailand, Cambodia, and Vietnam — are melting faster due to global warming, and rivers such as the Mekong are already heavily dammed, which gives countries upriver huge power over the water supply for downriver nations.

## The State of the Environment in Asia: 1999/2000

As an island country located in the , the Philippines is extremely vulnerable to the impacts of climate change. It is forecasted that India will overtake Japan in terms of nominal GDP by 2025.
