Optical Materials Reliability and Testing: Benign and Adverse Environments

Some programs or specific competitions have program announcements that provide more details about their activities described in this Guide. Please see of the Frequently Asked Questions FAQ for information on how to obtain a hardcopy of this document. In these cases, a preliminary inquiry should be made to the appropriate program officer before a proposal is submitted.

Optical Materials

We returned earlier generations of these products to the U.

Optical materials reliability and testing : benign and adverse environments : 8

To provide for the fair and equitable selection of the most meritorious research and education projects for support, the National Science Foundation has established criteria for their review and evaluation.

Langley Technical Report Server

Of particular interest are issues in rapid system prototyping for experimentation and manufacturing, including the use of field-programmable gate arrays; new interconnect technologies for building high performance computing systems such as multichip modules and optoelectronics; and systems issues including interfacing, standards, and tool integration. Each of our business groups maintains dedicated sales forces and marketing teams focusing on physicians who specialize in the diagnosis and treatment of different medical conditions. Deadline The deadline for State applications is usually mid-March.

Multi

GOALI provides opportunities through a series of mechanisms for direct linkages between academic researchers and industry. Scotti, Numerical Studies of Convective Cooling for a Locally Heated Skin, NASA TP-3100, May 1991, pp.
