Top 10 Pro & Con Arguments

In the rest of the United States, doctors can provide treatment intended to minimize physical and emotional suffering, but they cannot intentionally hasten death.

Assisted Suicide: A Right or a Wrong?

Why do people seek physician-assisted death? Views on assisted suicide are also affected by the amount of thought given to end-of-life issues; 57% of those who have given a great deal of thought to these issues approve of legal assisted suicide, a view shared by only 35% of those who have given little or no thought to these matters. It is often a shame that they have to do so, but it is to their great moral credit that they are willing to do so. Baltimore, Md: Johns Hopkins University Press; 2004:91—101.

Right to Die and Death With Dignity Organizations

Harold Glucksberg and three other physicians sought a that the state of Washington's law prohibiting assisted suicide was unconstitutional as applied to terminally ill, mentally competent adults. Civil governments should define marriage for all citizens.

Ethical Concerns in End

They both had conflicting views, which ended up in a feuding battle.

Right to die

We imagine that in a more humane and religious and better educated time, they must have been personally authoritative and sensitive, but we have to add that the techno-challenge faced routinely by physicians today is unprecedented. Electing to have or not to have CPR is a difficult but common medical decision that patients nearing the end of life often make. A hospital patient might have several doctors, nurses, and support personnel on every shift, and a patient might also see a therapist, nutritionist, or pharmacologist, to name a few.
