Semi

The parameter S_r , representing potential maximum retention, was obtained using Eq.

India: Issues and Priorities for Agriculture

However, among all the study basins, the Man basin experienced this drought phenomenon only for one year 1986.

Water management using traditional tank cascade systems: a case study of semi

Although it is an example of an industrialized state, more than 50% of the population depend on the agriculture and allied activities for their livelihood, which increases the vulnerability of drought disaster.

The Developments of Indian Agriculture after Independence

Chinnasany P, Agoramoorthy G 2016 India's groundwater storage trends influenced by tube well intensification. Indian growth remains below 2% per annum; in contrast, China's total factor productivity growths is about 6% per annum, even though China also has smallholding farmers. The district is part of the Vaigai river basin, wherein the river approximately bisects the district into two halves.
