## Economic and Policy Studies

Check back periodically for updates. The technical report includes a description of the project resources, mine plan, capital costs, operating costs, metallurgy and financial analysis. Family Investment Administration, Maryland Department of Human Resources, October 1999.

**Quaterra Mineral Resources Inc.**

Unpublished paper presented to Population Association of American conference, March 25, 2000. Within urban areas, minorities, especially Blacks, are disproportionately likely to reside in areas of concentrated poverty and welfare receipt. Glendale could annex the largest piece of land since it took in Luke Air Force Base in 1995.

## Vulture: Preliminary Evaluation Vulture Mine Placer Potential

According to the NSAF, Hispanics were substantially underrepresented among welfare leavers 13. Percent Employed During First Quarter After Exit Illinois Leavers: July 1997-December 1998 Whites Blacks Hispanics Statewide 55. Across metropolitan areas, the percent change ranged from 7.

## SEED

Louis area, while 64 percent of Black recipients do. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements.

## **SEED**

While this question is not directly addressed in the leavers studies analyzed here, some of the findings reported suggest that minorities may be particularly vulnerable to communications failures between recipients and caseworkers. However, there is some concern that minorities are not sharing equally in the benefits of these changes.

### **Economic and Policy Studies**

However, within California, caseloads have fallen much less among Hispanic families than among either Black or non-Hispanic White families, indicating that this is not a purely geographic story.

### **U.S. Economy at a Glance**

Economic Development Director Brian Friedman said developers are rarely interested in land until they are certain water and sewer lines can reach it.
