### International Conference on Coating and Surface Engineering ICCSE061 in August 2021 in London

With its high quality, it provides an exceptional value for students, academics and industry researchers. Schnedeker, Preprints of 8th International Thermal Spraying Conference, September, 1976, Florida, USA American Welding Society p. A semiquantitative model of the coating microstructure is presented to compare its effects on the propagation of ultrasonic and thermal waves.

### International Conference on Coating and Surface Engineering ICCSE061 in August 2021 in London

This is taken to explain the success of thermal waves, and the failure of ultrasonic waves, in producing measurable interference effects in plasma-sprayed coatings. Ash Academic Press, London, 1980 p.

### Influence of coating microstructure on the abrasive wear resistance of WC/Co cermet coatings

The effects observed are shown to be attributable to thermal wave interference in the coating material. International Conference on Coating and Surface Engineering has teamed up with the Special Journal Issue on.

### International Conference on Coating and Surface Engineering ICCSE061 in August 2021 in London

Measurements of molybdenum NiAl and aluminium coatings are presented to demonstrate that the technique can be used for defect detection, coating thickness determination and thermal property evaluation. Cox, MSc thesis, University of Bath 1979 unpublished. All submitted papers will have the opportunity to be considered for this Special Journal Issue.
