Jurassic geology of the world : Arkell, William Joscelyn, 1904

Cycads were also common, as were ginkgos and Dicksoniaceae tree ferns in the forest. The extinct Mesozoic conifer family Cheirolepidiaceae dominated low latitude vegetation, as did the shrubby Bennettitales.

Landscapes of the Jurassic Coast

Middle Jurassic strata are neither well represented nor well studied in Africa. The Jurassic is named after the Jura Mountains within the European Alps, where limestone strata from the period was first identified. The shape of the coast as we know it now is something which has evolved and developed over time and will continue to change into the future.

GEOL 102 The Mesozoic Era I: Triassic

At a very basic level, hard rocks like limestone and sandstone tend to form steep cliffs, while soft rocks like clay tend to collapse into big landslides. Divisions The Jurassic period is divided into the Early Jurassic, Middle, and Late Jurassic epochs.

Late Permian

Wildlife and the built environment Just as geology has shaped the landscape it has also shaped wildlife and people.

Jurassic geology of the world. (1956 edition)

We present revised plate tectonic and paleogeographic reconstructions of the western Tethyan region for the time interval between the late Permian ~ 260 Ma and the early Jurassic 200 Ma , which encompasses the time of the breakup of Pangaea.

Jurassic geology of the world (Book, 1956) [styleguide.expo.io]

Other major events include the appearance of the earliest lizards, and the evolution of therian mammals, including primitive placentals. Hooken Landslide This old landslide near Branscombe hides a spectacular section of the South West Coast Path within its chasm.
