Reviewer's Note: Of Richard A. But, according to critic Linus Pauling, they were also building on the semiempirical 1916 proposal by chemist Gilbert Lewis that ionic and homopolar bonding could be explained by electron-pair sharing of atoms. Of Jewish background, London left Nazi Germany in 1933 and moved to Oxford, England.

But London's scholarly interests soon changed from philosophy to theoretical science. Sensing fundamental advances happening in physics, he began its study, working under Born, Sommerfeld and Schrödinger in Munich and Zürich. Gavroglu has successfully interwoven the details that compose the tapestry of London's short life.
