It would actually be very nice if you could add a little bit about yalpanatamil and its special features in the section on dialects. Also add anything about the work of the Govt of Sri Lanka on technical terminology you think appropriate. We can see part of this work related to science in Tamil Virtual University web site.

Talk:Tamil language

I believe they should be treated in different sections, since the doesn't regard the writing system used to convey those sounds. In the 1960s, a singer by the name of MS Subbulakshmi sang a song from the classical Tamil epic Cilappatikāram which, by the way, was composed by a poet from the area where Malayalam is spoken today. This explains why syntactical differences exist between the languages of North India on the one hand and Sanskrit, Greek and Latin on the other; and why there exists similarity between north and south Indian languages.

mutter

They're much closer than classical Greek and modern Greek, and a little further apart than Old Norse and modern Icelandic. I do not have much knowledge on this matter.

mutter

Classification Tamil is a member of the , which includes the , , , and languages.

Talk:Tamil language

Continue with your good work. Please see if it's fine. Tamil seems to have undergone minimal changes and adaptations over the years.
