Master's in Sport and Exercise Psychology

Applied sport psychologists are uniquely trained and specialized to engage in a broad range of activities including the identification, development and execution of the mental and emotional knowledge, skills and abilities required for excellence in athletic domains; the understanding, diagnosing and preventing of the psychological, cognitive, emotional, behavioral and psychophysiological inhibitors of consistent, excellent performance; and the improvement of athletic contexts to facilitate more efficient development, consistent execution and positive experiences in athletes. Graduate students in this concentration typically come from Kinesiology or Psychology undergraduate programs and choose UNCG to learn how to enhance human development and functioning by acquiring cutting edge knowledge in the area of SEP. It can be really easy to get stuck in what everyone else is doing, but stick to what you love to do and how you love to do it and you'll be just fine! Jack Watson provided mentorship with autonomy and independence, and support through challenges.

What is exercise physiology? Clearing up the confusion about this multifaceted career

The profession can be as varied as helping athletes reach peak fitness; guiding people in their journeys to lose weight; or rehabilitating patients suffering from chronic illness. The University also offers the W.

About Applied Sport & Exercise Psychology

Due to the possibilities for intervention, coach behaviors have received the greatest attention, with research primarily addressing this through the implications of autonomy-supportive versus controlling behaviors. Applicants are encouraged to submit their application with unofficial transcripts from all previously attended institutions.

Sport, Exercise and Performance Psychology

Recent students have presented at the European Congress of Sport and Exercise Psychology FEBSAC , Association for Applied Sport Psychology national conference AASP , American Psychological Association APA , Midwest Sport and Exercise Psychology Symposium MSEPS , the American College of Sports Medicine ACSM meeting, and the U. This degree is typically in Psychology. This program prepares students to meet external registration requirements by the in becoming a Certified Mental Performance Consultant CMPC.
