The Optics ImageBank, which provided a visual search and browse across all the figure images in available journal articles, gave researchers a way to locate and export scientific images using the context of the figure caption, the in-text reference, and related images as guides. Experimental work on such topics as the search for parity violation, spectroscopy and collision processes of fast, highly-stripped heavy ions, exotic atoms, high-Rydberg states, laser spectroscopy, photoelectron spectroscopy, and others are described. The report pictured in displays a column for each tag, making it easier for an editor to accurately review the contents.
