Managing Investors' Risk in Pay for

## Success Projects

If the project meets its target outcomes, the grant is repaid to the investor albeit without a return. The authors present a field-tested method for doing this while facilitating sustained institutional development through the strengthening of local interorganizational networks.

## Managing project

He earned his BA from Virginia Tech and his MS from the London School of Economics, both in international development. Risk to Investors in Pay for Success All investments carry risk. So far, guarantees have been used in two US PFS projects.

## THE SUCCESS METRICS AND THE SUCCESS FACTORS

The current techniques to reduce risk have been made possible by several philanthropic investors who have been willing to accept greater risk, lower returns, or even no financial returns through grantmaking to advance a project aligned with their goals. As the market grows, a relationship between the level of risk and the type of enhancement or the need for a credit enhancement may become clear. Carefully selecting a rigorous evaluation design, ensuring access to necessary data, and enlisting a qualified program evaluator can reduce this risk.

## Beyond coordination and control: An interorganizational approach to structural adjustment, service delivery, and natural resource management

By segmenting the outcomes based on evidence that the program will improve each outcome and by having different investors for each outcome, investors who are more risk averse can still participate by choosing to be repaid based on the outcome with a stronger history of evidence. In addition to the financial implications of these performance risks, investors and other project partners should anticipate the potential reputational risks of project nonperformance because the PFS field is still nascent.

## THE SUCCESS METRICS AND THE SUCCESS FACTORS

For PFS projects that replicate an existing program, a strong theory of change should be supplemented by evidence of effectiveness Milner and Eldridge 2016.

## **THE SUCCESS METRICS AND THE SUCCESS FACTORS**

In addition to research and project management for the Initiative, she runs the only pay for success training and technical assistance online Support Center which connects questions in the field with answers from Urban subject matter experts.

### **Managing Investors' Risk in Pay for Success Projects**

It's being examined the correlation between success and various factors; the level of correlation between the success of different Local Authorities of Israel and the activities carried out by them in the process of implementing the quality management system. Before joining Urban, he worked at the World Bank and as a consultant on financial services policy and regulatory issues. The risks of PFS are less well understood, and there are no established markets for managing risk.
