Global Digital X

Our are sensitive to the particular wavelength of visible light, but not to the shorter wavelength of higher energy X-ray waves or the longer wavelength of the lower energy. The energy level of the photon fits with various energy differences between electron positions.

Global X

. An electron in a higher orbital immediately falls to the lower energy level, releasing its extra energy in the form of a photon. In fluoroscopy, the X-rays pass through the body onto a fluorescent screen, creating a moving X-ray image.
