Acids and Bases

Watson, books about the great pioneers in chemistry like Lavoisier and Sanger, or the development of modern chemistry. All matter is made up of these four elements and matter had four properties: hot, cold, dry and wet.

History of Chemistry, Chemistry, Books

Humans have always sought to identify, use and change the materials in our environment. Joseph Priestley 1733-1804 isolated and characterized several gases: oxygen, carbon monoxide, and nitrous oxide.

chemistry: History of Chemistry

Following the invention of the battery by Alessandro Volta 1745-1827, the field of electrochemistry both theory and application developed through major contributions by Humphry Davy 1778-1829 and Michael Faraday 1791-1867. Ironically, Boyle himself never thought that metals were elements.

1.2: History of Chemistry

He invented the alembic, a device used to distill and study acids. .

History of Chemistry, Chemistry, Books

Very early chemists were often motivated mainly by the achievement of a specific goal or product. Using Thomson's mass ration, Millikan found the mass of one electron to be 9. He also developed an early chemical classification system using the properties of the materials he studied.
