Migration of contaminants in groundwater at a landfill: A case study: 5. Cation migration in the dispersion test

Rate of abiotic formation of 1,1-dichloroethylene from 1,1,1-trichloroethane in groundwater.

Contaminant transport

Solubilities of common organic contaminants vary widely see and are influenced by hydrophobicity, temperature, salinity, dissolved organic matter, or the presence of multiple organic compounds in solution cosolvents.

Contaminant transport

SOURCE: Modified from API, 1989.

Case Studies in Groundwater Contaminant Fate and Transport

These include chemicals used in dry cleaning, wood preservation, asphalt operations, machining, and in the production and repair of automobiles, aviation equipment, munitions, and electrical equipment.
