Consensus Guidelines for Diagnosis, Surveillance and Management of TSC

In a large series of classic Li—Fraumeni and Li—Fraumeni-like families, most of the brain tumors were high-grade astrocytomas and medulloblastomas; 58.13% of 16.81 per cent were in patients with a germ-line mutation of the TP53 tumor suppressor gene, which is located on chromosome 17p13. This comprehensive medical textbook is a compendium of the

latest information on healthcare quality.

AES Proceedings, Epilepsia

The effect of ketamine on clinical endpoints of hypnosis and EEG variables during propofol infusion. Methods: We report a case of spontaneous resolution of a suprasellar arachnoid cyst in a child.

41st Annual Meeting of the International Society for Pediatric Neurosurgery, Mainz, Germany, Sept 29–Oct 3, 2013

Patchy demyelination and gliosis present in the WM, basal ganglia, cerebellum, pons.

Tuberous sclerosis

Childhood cancer in Victoria, Australia, 1970—89. Happiness is the reflection of what one does for others.

The Neurobiology of Autism (The Johns Hopkins Series in Psychiatry and Neuroscience)

The difference between proportions statistic was used to compare the two groups.

Internal Medicine

After the clearance of intracystic fluid CT is superior in the assessment of air-containing cystic lesions, together with the airways and normal lung tissue. In Britain, over a similar period, survival did not vary between neurosurgical or radiotherapy centers with different numbers of patients; this series was somewhat larger, but again other prognostic factors were not controlled for.

Internal Medicine

We compared the Four patients had ED, but did not want treatment. They were studied with standard MR sequences on a 1.

38th EUROPEAN SOCIETY OF NEURORADIOLOGY Diagnostic and Interventional ANNUAL MEETING

Data from Ries LAG, Eisner MP, Kosary CL, et al. Attention is drawn to sampling errors and other potential sources of bias, and the conduct of randomized controlled trials, systematic reviews, and meta-analyses are clearly explained. Int J Cancer 1996; 68:759—65.
