## Oceanography

Prior to satellite data, most of what we have learned about the oceans had come from infrequent measurements collected from ships, buoys, and drifters. Why does NASA study the ocean? Part 1 Systems and instruments: visible and infrared instruments, P. Part of NASA's mission is to develop an understanding of the total Earth system and the effects of natural and human-induced changes on the global environment.

## Space Oceanography

Collecting and analyzing long-term ocean data from satellites is a relatively new field of exploration.

## Oceanography

The advent of ocean-observing satellites has launched a new era of marine discovery. It is not surprising that the oceans represent over 99% of the living space on Earth. First; passive microwave results, P.

**Space oceanography : lectures presented at an intensive course organised by the European Institute for Advanced Studies in Oceanography, University of Dundee, Scotland, 2nd**

Part 2 Data handling and atmosphere effects: image processing, N. Another satellite, Tiros-N, was also launched in 1978. Studying these patterns at a global scale help forecast and mitigate the disastrous effects of floods and drought.
