A model of an Indian village: A study of alternative sources of energy for irrigation

The HYV high-yielding varieties package necessitated more expensive seeds, greater amount of controlled water irrigation and chemical fertilizers, and hence, there was demand for more subsidies.

Ambivalences of collective farming: Feminist political ecologies from the Eastern Gangetic Plains

On the other hand, the scheduled castes, although found in sizeable numbers everywhere, are generally concentrated in north Bihar which has about 60 percent of the scheduled caste population of the state. Specifically, we find evidence that farmers in land areas more suitable for groundwater irrigation cultivated more high value crops such as vegetables, fruits, and cash crops.

The total mandays of wage-employment of a labourer in all occupations was 72 days higher in 1964-65 and 30 days higher 1974-75 but 17 days lower in 1977-78 in Punjab than Bihar respectively again. Despite numerous environmental and economic benefits of land and water management interventions in Ethiopia, this review revealed gaps in AM approaches. A National Seed Grid will be established to ensure supply of seeds especially to areas affected by natural calamities.

Bihar

From the survey, it can be observed that most of these works were provided during the rabi agricultural season in which availability of farm employment is not very low. Such records will help in keeping a track of the well being of the migrant workers.

Bihar

Milk yield of cow was increased from 8.

Economics agriculture project

While on the one hand, land reforms in the state met with dismal failure, particularly due to resistance from the landed gentry and legal obstacles, on the other hand, a high growth rate of population, coupled with fragmentation of land holdings, has led to a decline in the size of operational land holdings in the state.
