8 common problems with literature reviews and how to fix them

In addition to consumer products, microelectronic devices have also permeated many critical areas in medical, aerospace, and military applications. Regardless of the regulatory motivation, minimization does lead to energy and economic efficiency.

After hardening, the polymer takes the inverse shape of the mold. Papers reviewing important developing topics of general interest may be accepted for publication as Review Papers.

Microelectronics

Electrically conductive adhesives are made of polymer matrix and conductive metal fillers. The gate dielectric was reported to be hafnium oxide based material grown by ALD.

Scientific & Academic Publishing: Aims and Scope

Special issues are devoted to significant international conferences, or to important developing topics.
