Mixtecan Languages

However, the distributional restriction on such syllables to initial position in the root condition 4b IS unusual, and this has led us, like many other Mixtecanists, to search for alternative ways to look at the problem. This argument, however, rests on positing either CVC-initial syllables with unacceptable codas or Another argument based on segmental diachronic evidence comes from Salmons n. However, virtually all longer forms can be analyzed as polymorphemic; if not synchronically, then certainly diachronically.
