Control and energy management strategies applied for solar photovoltaic and wind energy fed water pumping system: A review

Like field coils, it consists of wire windings on a core.

Solar electricity helps reduce the need for new large-scale—and often environmentally harmful—generating stations and distribution lines. The product between these two fields gives rise to a force, and thus a torque on the motor shaft. Motor, and inverter will be packed well.

There must be an air gap between the stator and rotor so it can turn. Rugged NEMA 3R inverter enclosure allows reliable outdoor and indoor installations.
