## Middle School Maths (Grades 6, 7, 8, 9)

Prizes are available for both schools and individuals and include trophies, medals and a cash award to the student achieving the highest mark. Again, students will be asked to explain and justify their strategies.

## Sigma Math Contest

Likewise, decibels are the powers of ten used when measuring the intensity of sound.

## Math Problems Worksheet for Junior High School

Maximum area is always a slice of pizza. In topology, a path is any continuous function from a line segment into the plane. By applying the Commutative and Associative Properties of Multiplication, the factors can be rearranged and recombined to become  $10 \times 12$  or  $6 \times 20$  to simplify the multiplication.

## Can Your Middle Schoolers Solve These Math Puzzles? — Mashup Math

Draw a bisector through this triangle out to a radius of  $\sqrt{3}$ . Adam's book entitled Guesstimation: Solving the World's Problems on the Back of a Cocktail Napkin.

## Math Problems Worksheet for Junior High School

If you wanted to color your four-region map, so that each region had its own color, and neighboring regions did not share the same color, you would need four colors. In fact, I would expect students to add two or three 2-digit numbers mentally by adding the digits having the same place value. Continue this way, turning over a card, placing it face up on the table, and moving the next card to the bottom of the deck.
