Library Roles in a Digital Age • CLIR

Information Literacy Instruction-helping people use library resources more effectively through directed and structured educational activities-is another core service that libraries have traditionally offered users. Archives and heterogeneous data The Flemish Archipel Project is focused on providing access and long term archiving of digitized material from a diverse set of memory institutions. Providing these as linked open data makes it easier to integrate further thesauri and or categorization systems into the network of interlinked thesauri, thus facilitating parallel search from different catalogs.

To preserve the library for the future, one of the saviors would be Amazon or an Amazon-like bookstore model that retrieved search results and ranked books on popularity. Prioritizing and making difficult decisions with respect to specific materials and resource allocation can be achieved more easily with supporting data. This serves as the foundation for enhancing the accounts system and leads to clearer code and more consistent data via database-level constraints.
