Child poverty levels for every neighbourhood in Bristol, South Gloucestershire and North Somerset revealed

There are three other neighbourhoods in Gloucestershire where more than a third of children are estimated to be living in poverty. This group are only a small subset of the poor population around a quarter of a million working age adults, or 4 per cent of the 7 million living in relative low income poverty.

The Honourable Company Of Gloucestershire Charitable Trust

More worryingly, Bristol is the city with the highest levels of child poverty in the South West at 27. The local data gives an idea of the relative poverty levels in different areas, but is adjusted to estimate what these actual levels would be if they could be measured on the same basis as the national household income survey.

Digital Poverty (The Business Brunch)

The Gloucester figures show that 30 per cent of children are living in poverty and in the Forest of Dean more than 25 per cent of children are living on the breadline as well. A further remarkable set of findings give some further insight into these processes.

Financial Poverty

In one part of Gloucester, areas surrounding Barton Street, a shocking 37 per cent of children are estimated to be living in poverty. I worry about not getting the referrals done fast enough.

Digital Poverty (The Business Brunch)

All three independent administrative datasets yield the same conclusion about the prevalence of severe and multiple disadvantage by local authority area. Journal of Geography in Higher Education Award for Promotion of Excellence co-winner 2001.
