## The Korean Economy (Six Decades of Growth and Development)

A growing economy interacting with urban regulations and transport systems shaped how a city grew. The idea that state-owned investment funds run by authoritarian regimes might buy into private markets and influence their movements is disquieting to many governments. Canada needs to continue to leverage its strengths and build stronger ties with the region in the future in order to improve market access and position itself as an important investor in and investment recipient from the diverse economies that make up the Asia Pacific.

## The Future of Asian Finance

In low-income and lower-middle-income countries, 90 percent of urban built-up area expansion occurs as horizontal growth Figure 2. Mitsubishi Group, through its subsidiary Mitsubishi Tanabe Pharma Corp.
