11 Innovations That Changed History

The Penicillin was mass produced during World War II to rid servicemen of venereal diseases and is still used as a standard antibiotic for infections. It was also one of the first programs to use a graphical user interface, as opposed to a text-based one—if you're reading this on a computer without knowing a single line of code, you can thank Sutherland and Sketchpad.

TIME

When an ice cream vendor at the fair ran out of dishes to serve his ice cream in, the vendor next to him—named Ernest A. There are various Chinese inventions that have shaped the way we perceive and live in this world.

11 Innovations That Changed History

Google Glass Google Glass is the first pair of smart glasses that is practical and works on an everyday basis.

30 Life

There is also evidence for the controlled use of fire by our ancestors, Homo erectus , beginning around 1,000,000 years ago. Basically, AI is related to make excellent machines that uses ultra-technology to perform its tasks. Oculus Rift puts them right in the action and we can only imagine how this incredible tech will be incorporated into games that we already know.

Top 10 Inventions that Changed Human Lives forever

Mitchell and Martin Cooper of Motorola demonstrated the first handheld device in 1973. In 1824, Portland cement was invented by Joseph Aspdin of England. The first workable prototype of the Internet came in the late 1960s, with the creation of ARPANET, or the Advanced Research Projects Agency Network.

35 Inventions That Changed the World

This could help determine their origin. His device was used to draw water from flooded mines using steam pressure. After looking into it a bit further, the scientist learned that what had kept the glass together was cellulose nitrate coating the inside of the glass—and thusly, safety glass was created.

Top 8 Inventions that Changed the World

The commercial appearance of train networks came in the 1820s. First developed in late 1947 by Bell Laboratories, these tiny semiconductor devices allow for precise control of the amount and flow of current through circuit boards.
