Finding Butterflies in Arizona: A Guide to the Best Sites by Richard Bailowitz

With 334 species of butterflies reported, Arizona ranks second only to Texas, and like Texas, its proximity to Mexico brings the prospect of exotic butterflies not readily seen elsewhere in the United States.

Finding Butterflies in Arizona: A Guide to the Best Sites

All these factors make this book essential-it approaches finding butterflies by species, by region, and by season. I used the Panama guide recently to locate a great butterfly area I had only visited once, in 1978, and their guide took me right to it.

Rich Bailowitz is definitely an expert on both lepidoptera butterflies and moths and odonata dragonflies and damselflies. I hope users of this guide are able to forward additional information on species, locations, and dates of capture or sighting, to the authors so they can update their information and add it to a later version of this guide, should there be one.
